CONTENTS

Preface ix

SECTION 1. THERMODYNAMICS 1

E. KALDIS, Kinetic and thermodynamic aspects of high temperature chemical transport and sublimation of EuS . . 3
V. S. BAN, Mass spectrometric and thermodynamic studies of the CVD of some III–V compounds 19
F. P. EMMENEGGER, Gaseous complexes – their role in chemical transport 31
G. M. BLOM and R. N. BHARGAVA, Radiative complex formation in vapor phase epitaxial GaP 38
J. H. E. JEFFES and T. N. R. MARPLES, The thermodynamics of chemical transport reactions with special references to the transport of tantalum by iodine 46
J. KORDIS, K. A. GINGERICH, R. J. SEYSE, E. KALDIS and R. BISCHOF, Synthesis, vaporization and crystal growth of gadolinium and holmium nitrides 53

SECTION II. KINETICS OF NUCLEATION AND GROWTH 61

II.A. *Nucleation theory*

J. P. HIRTH, Some comments on heterogeneous nucleation from the vapor phase 63
A. J. DONOHOE and J. L. ROBINS, Mobility and coalescence of nuclei in metal vapour deposition on alkali halide substrates 70
M. R. HOARE and P. PAL, Statistics and stability of small assemblies of atoms 77
R. LACMANN and H.-J. RANDIG, Electrolytic nucleation of copper and brass on platinum single crystal spheres . . . 97

II.B. *Kinetics and convection*

S. VEPŘEK, Chemical evaporation and deposition of solids in a non-isothermal plasma; chemical transport of carbon 101
L. M. ROUSE and E. A. D. WHITE, Interface reactions in II–VI compounds 117
T. B. REED and W. J. LAFLEUR, Dependence of growth temperature on carrier gas velocity in open tube transport 123
B. J. CURTIS and J. P. DISMUKES, Effects of natural and forced convection in vapor phase growth systems 128

SECTION III. GROWTH OF SINGLE CRYSTALS 141

K. NAGASAWA, Y. BANDO and T. TAKADA, Crystal growth of vanadium oxides by chemical transport 143
M. RUBENSTEIN, Preparation and analysis of homogeneous solid solution crystals of the system Si–Ge 149
V. L. CARDETTA, A. M. MANCINI, C. MANFREDOTTI and A. RIZZO, Growth and habit of GaSe crystals obtained from vapour by various methods 155
I. LUBEZKY and D. S. TANNHAUSER, Epitaxial growth of very pure NiO single crystals 162

SECTION IV. THIN FILMS 167

IV.A. *III–V films*

H. J. QUEISSER, Propagation of dislocations during epitaxy 169
J. HALLAIS, C. SCHEMALI and E. FABRE, Vapour epitaxial growth and characterization of $InAs_{1-x}P_x$ 173
H. WATANABE, T. NISHINAGA and T. ARIZUMI, Vapour transport equations for III–V compound semiconductors . . 183
J. V. DILORENZO, Vapor growth of epitaxial GaAs: a summary of parameters which influence the purity and morphology of epitaxial layers 189
K. RICHTER, On the early deposition of GaP onto GaAs 207

IV.B. *II–VI and IV–VI films*

M. MOULIN, A. HUBER and M. DUGUE, Contamination of CdS heteroepitaxial layers during vapour growth on GaAs substrates 212
P. BLANCONNIER et P. HENOC, Croissance épitaxique des composés II–VI en phase vapeur 218
S. E. R. HISCOCKS, The vapour growth of IV–VI compounds 222

IV.C. *Si, Ge, and oxides-on-Si films*

G. W. CULLEN and F. C. DOUGHERTY, Silicon on spinel: the interaction between deposition constituents and the substrate surface 230
J. NISHIZAWA, T. TERASAKI and M. SHIMBO, Silicon epitaxial growth 241

M. Druminski and H. Schlötterer, The combination of two growth methods for the epitaxial deposition of silicon films on insulating substrates . . . 249
H. Aharoni, A. Bar-Lev and S. Margalit, Defects in epitaxial layers of silicon–germanium grown on silicon substrates 254
G. E. Gottlieb and J. F. Corboy, Jr., The development of a dual rate technique for the growth of silicon-on-sapphire films . . . 261
F. L. Gittler, Epitaxial deposition of silicon in nitrogen . . . 271
D. M. Brown, M. Garfinkel, M. Ghezzo, E. A. Taft, A. Tenney and J. Wong, Characteristics of doped oxides and their use in silicon device fabrication . . . 276
S. Margalit, A. Bar-Lev, A. B. Kuper, H. Aharoni and A. Neugroschel, Oxidation of silicon–germanium alloys 288
M. Balog, M. Schieber, S. Patai and M. Michman, Thin films of metal oxides on silicon by chemical vapor deposition with organometallic compounds . . . 298

IV.D. *Liquid phase epitaxy*
S. L. Blank and J. W. Nielsen, The growth of magnetic garnets by liquid phase epitaxy . . . 302
B. Ferrand, J. Daval and J. C. Joubert, Heteroepitaxial growth of single crystal films of YIG on GdGaG substrates by hydrothermal synthesis . . . 312
E. A. D. White and J. D. C. Wood, Heat and mass transfer in liquid phase epitaxy processes . . . 315
W. Tolksdorf, G. Bartels, G. P. Espinosa, P. Holst, D. Mateika and F. Welz, Controlled lattice constant mismatch by compositional changes in liquid phase epitaxially grown single crystal films of rare earth yttrium iron gallium garnets on gadolinium gallium garnet substrates . . . 322

IV.E. *Miscellaneous films (Xe, Fe, Ni, NH_4Cl)*
H. M. Kramer and J. A. Venables, Epitaxial growth of rare gas crystals . . . 329
M. Gebhardt und A. Neuhaus, Phasen und Epitaxien in gasnitrierten polykristallinen Fe-Blechen und einkristallinen Fe-Folien . . . 333
C. Motoc and M. Badea, Epitaxial growth and the electrical properties of the substrates . . . 337

IV.F. *Characterization of films*
R. E. Weber, Auger electron spectroscopy for thin film analysis . . . 342
L. E. Davis, L. L. Levenson and J. J. Melles, A study of phosphorus adsorption and desorption kinetics on silicon (111) surfaces . . . 354
M. Oron, Substrate contamination during LPE growth of lithium-chromium ferrite film as evidenced by Mössbauer spectroscopy . . . 357
T. Bandyopadhyay, F. Granzer and K. F. Gütlich, Electron microscopic investigations on the annealed structures of epitaxially grown evaporated LiF films . . . 360

List of authors quoted in references . . . 369

Author index . . . 377

Subject index . . . 380

Compound index . . . 382
